PROJ A472

Addressing Adherence Challenges Associated With Antiretroviral Therapy: Focus on Noninfectious Diarrhea

This supplement to *The American Journal of Managed Care* provides an overview of the importance of treatment adherence to HIV therapeutic regimens and approaches to improving adherence. Also discussed are the prevalence of diarrhea in patients with HIV; the impact of diarrhea on quality of life; the potential effect of diarrhea on adherence to highly active antiretroviral therapy (HAART); and the diagnosis and management of HAART-related diarrhea.

■ SUPPLEMENT POLICY STATEMENT ■

Standards for Supplements to *The American Journal of Managed Care*

All supplements to *The American Journal of Managed Care* are designed to facilitate and enhance ongoing medical education in various therapeutic disciplines. All *Journal* supplements adhere to standards of fairness and objectivity, as outlined below. Supplements to *The American Journal of Managed Care* will:

- I. Be reviewed by at least one independent expert from a recognized academic medical institution.
- II. Disclose the source of funding in at least one prominent place.
- III. Disclose any existence of financial interests of supplement contributors to the funding organization.
- IV. Use generic drug names only, except as needed to differentiate between therapies of similar class and indication.
- V. Be up-to-date, reflecting the current (as of date of publication) standard of care.
- VI. Be visually distinct from *The American Journal of Managed Care*.
- VII. Publish information that is substantially different in form and content from that of the accompanying edition of *The American Journal of Managed Care*.
- VIII. Prohibit excessive remuneration for contributors and reviewers.
- IX. Carry no advertising.

Publisher's Note: The opinions expressed in this supplement are those of the authors, presenters, and/or panelists and are not attributable to the sponsor or the publisher, editor, or editorial board of *The American Journal of Managed Care*. Clinical judgment must guide each professional in weighing the benefits of treatment against the risk of toxicity. Dosages, indications, and methods of use for products referred to in this supplement are not necessarily the same as indicated in the package insert for the product and may reflect the clinical experience of the authors, presenters, and/or panelists or may be derived from the professional literature or other clinical sources. Consult complete prescribing information before administering.
