

Missing Negative Sign in Results Section of Abstract

In the Original Research article “Impact of Complex Care Management on Spending and Utilization for High-Need, High-Cost Medicaid Patients” published in the February 2020 issue of *The American Journal of Managed Care*®, a number in the Results section of the Abstract was missing a negative sign. The 95% CI for the adjusted difference in specialist visits should have been “-1.98 to -0.73.” ■

This article was corrected online.
